

Master Erasmus Mundus of Media Engineering for Education (EUROMIME)

University of Poitiers - France

Faculty of Human Motricity of Lisbon, Portugal

National University of Distance Education of Madrid, Spain

>> IMPORTANT ! Academic year 2008: European students

A European master specialized in educational technology

Euromime is one of the 103 European masters (in various fields and countries) selected by the European Commission within the Erasmus Mundus Program.

This Excellence Program trains high level specialists in the field of Educational Technology by offering a multi-field curriculum which integrates the contributions of educational science, ICT, data processing, digital video, cognitive psychology, economics and law.

In the course of the program, the students participate in the design and conception of large scale projects and acquire professional experience through an internship in a company.

After completing the program the students will be able to manage projects in design, conduct and evaluation of computer mediated environments. They will have the opportunity to carry on these functions in the current context of the massive deployment of distance education. Students who wish to do research can do so through a doctorate.

The Euromime master is run by a consortium of three European universities, recognized for their experience in teaching and research in the field of Educational Technology (Department of Media Engineering for Education of the University of Poitiers, France ; National University of Distance Education of Madrid, Spain ; Faculty of Human Motricity of Lisbon, Portugal) and of three Latin American universities (University of Los Lagos, Osorno, Chile ; Catholic University of Peru, Lima ; National University of Brasilia, Brazil).

European and Third Countries students can follow a two year program in the three European universities (for at least one semester in each university).

European students can attend the 2-year European Master in Media Engineering for Education (EuroMIME) in the three European universities of the consortium (at least one semester in each of the three universities) and in a Latin American university (3-month study period).

Once they have achieved the master, students will acquire the three national university qualifications.

European students will receive a 3100 € scholarship for the study period in Latin America and an Erasmus grant for the second year.

The courses of the EuroMIME program cost €1500/year.

>> Prerequisites:

- ✓ Excellence in university performance
- ✓ Projects in the field of Educational Technology
- ✓ Basic command of ICT (C2I or equivalent)
- ✓ Basic command of French, Spanish and Portuguese

European candidates can apply on line until June 15, 2008 : <http://www.euromime.org>
